DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-8, 10, 12-18, 20, 41-43, 45-48, 50, 52-58, and 60 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen et al. (US Patent 5,682,858).

The patent to Chen et al. shows a unit fuel injector, the injector internally preparing fuel during an injection event at a pressure sufficient for injection into an internal combustion engine by means of an intensifier piston 50, comprising a selectively actuatable controller being in fluid communication with a source of pressurized actuating fluid and being in fluid communication with a substantially ambient actuating fluid reservoir, the controller having a first valve 36 for selectively independently porting actuating fluid to and venting actuating fluid from the intensifier piston and a second valve 40 for selectively independently porting actuating fluid to and venting actuating fluid from a needle valve during the injection event for controlling opening and closing of the needle valve, wherein the two valves are disposed in a coaxial arrangement and the two valves are independently electrically actuated by solenoid 30. The patent to Chen et al. also shows a needle back piston 62 having a shank 64 bearing on a tip margin of a needle valve 60 and a second variable displacement chamber 18 in cooperation with the needle back piston as recited in claim 20.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 21-23, 25-28, 30-34, 36, and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al. '858.

The device of Chen et al. is capable of carrying out the method since the device of Chen et al. comprises all of the structural limitations as recited.

Allowable Subject Matter

5. Claims 4, 9, 11, 19, 24, 29, 35, 37-39, 44, 49, 51, and 59 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
